### DETAILED ACTION

1. The abstract of the disclosure is objected to because it contains the term "means" (i.e. legal phraseology) throughout. Correction is required. See MPEP § 608.01(b).

2. The disclosure is objected to because of the following informalities: on page 6 – line 4, "fn" should be –on--.

Appropriate correction is required.

3. Claims 15-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15, "either side" in line 3 lacks clear antecedent support as a leading edge is not inherently limited to two sides as such ( e.g. could include a left side, a right side, a top side etc.).

Claim 18, "each corner" in line 4 lacks clear antecedent basis as a leading edge per se does not inherently include corners as such.

Claim 23, "either end" in the second to last line lacks clear antecedent basis as two ends per se are not necessarily inherent to an extensible member as such.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3612

5. Claims 13-14 and 18, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Pavlik '826.

Note pallet 10, chassis 12,14+, locomotion means/rollers 40, and locking means 89,90+ as broadly claimed.

Claim 14, note roller at 79,81.

Claim 18 note first locking means 89,90+ and second locking means 79+ as broadly claimed and as best understood. Note also element 106+ reads on the second locking means as broadly claimed.

6. Claims 13-14, 18, and 21, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Seo '365.

Note pallet (figure 1 embodiment), locomotion means/lower rollers, and locking means (including the side rollers) as broadly claimed.

Claim 18, note the side rollers define second locking means and the element at reference 20 or 20' defines first locking means as broadly claimed.

Claim 21, the other element 20 or 20' on the trailing edge of the pallet reads on the third locking means. Note extensible member 43+ is movable into close abutment as broadly claimed.

7. Claims 15-17, 19-20, and 22-23 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
